

Meseret Gachena Dirisa

London, UK | 07424 034508 | messigachena2@gmail.com

Portfolio: mesigachena1-collab.github.io/Meseret-Dirisa/

Eligible to work in the UK

Profile

I am a Computing student at the University of Greenwich with a solid background in problem-solving and systematic logic. My path is unique: I completed four years of a Civil Engineering degree in Ethiopia, establishing a strong foundation in math and structural analytics, before redirecting my focus toward software engineering and web technologies in the UK. Having handled corporate tech setups as a support engineer and navigated fast-paced customer roles here in London, I know how to fix technical bottlenecks and explain them clearly to everyday users. I am seeking a placement, internship, or part-time role in software development, web engineering, or IT support where I can write clean code and support team infrastructure.

Education

BSc (Hons) Computing | *University of Greenwich, London* * **Timeline:** 2024 – Present
(Expected Graduation: June 2027)

- **Year 1 & 2 Completed Modules:** Object Oriented Programming, Programming Foundations, Software Engineering, Introduction to Data Science, Computer Systems and Internet Technologies, Principles of Security, Systems Development, Mathematics for Computer Science, Applications in AI and Data Science, Agile Development with SCRUM, Data Structures and Algorithms, Web Programming 1 & 2, User Interface Design, Application Development.
- **Upcoming Year 3 Specialisms:** Final Year Project, Machine Learning, Advanced Topics in Data Science and AI, Human Computer Interaction and Design, Requirements Management.

NVQ Level 2 – IT & Digital Technology | *College of Haringey, Enfield & NE London* | 2023 – 2024

GCSEs (Maths & English) | *West London College, London* | 2023 – 2024

UCL Summer School – Bridging the Future | *University College London* | 2023

BSc Civil Engineering (4 Years Completed) | *Haramaya University, Ethiopia* | 2012 – 2016

- *Built core competencies in mathematical logic, structural analysis, and quantitative problem-solving.*
-

Technical Skills

- **Core Coding:** Python, JavaScript (ES6+), SQL (PostgreSQL/MySQL), HTML5, CSS3 (Flexbox/Grid)
 - **Methodologies & Tools:** Git, GitHub, Agile/SCRUM frameworks, Responsive Web Design, REST APIs, Object-Oriented Programming (OOP)
 - **IT Infrastructure:** Desktop Troubleshooting, Hardware Upgrades, Network Configuration, Active Directory basics, MS Office Suite
-

Technical Projects & Coursework

Web & Application Programming

- **Responsive Interfaces (Web Programming & UI Design):** Designed and launched web layouts using pure JavaScript, HTML5, and CSS3. Focused on creating mobile-first structures, manipulating the DOM, and testing interfaces for user accessibility.
- **Collaboration & Workflow (Agile Development with SCRUM):** Managed project code bases using Git and GitHub within team-based environments. Practiced structured software delivery concepts, focusing on organized code repositories and clear documentation.

Data Logic & Software Engineering

- **Data Processing (Introduction to Data Science & AI):** Wrote Python scripts to clean up, sort, and process data tables for university modules, working with core programming principles to isolate target information.
 - **System Logic (Object-Oriented Programming & Data Structures):** Built simple software applications using strict OOP guidelines in Python, practicing data abstraction and troubleshooting algorithm efficiency to handle backend tasks.
-

Work Experience

Retail Assistant | *Sainsbury's, London* | Feb 2025 – Present

- Manage point-of-sale transactions and help monitor inventory levels under pressure in a busy, high-volume retail environment.
- Coordinate with the store team to keep shift turnarounds organized and maintain smooth floor operations.

Volunteer Receptionist (IT & Admin Support) | *NHS Trust, London* | Sep 2023 – Sep 2024

- Handled patient record databases and appointment schedules while sticking closely to data privacy rules.
- Offered immediate, informal tech help to clinical staff when software froze or hardware malfunctioned, keeping frontline desks running without disruption.

IT Support Engineer | *RH Construction Company, Ethiopia* | May 2017 – Feb 2019

- Managed everyday technical support for office personnel, diagnosing and fixing hardware faults, software system errors, and office network connectivity issues.
- Setup and deployed employee desktop units and localized file systems to decrease team down-time.
- Communicated step-by-step troubleshooting instructions to non-technical workers to solve operating errors quickly.

Customer Service & Sales Roles | *Various Companies, London & Ethiopia* | 2019 – 2024

- Built clear communication skills, solved customer inquiries, and kept administrative paperwork sorted within busy workplace environments.

Interests & Passions

- **Full-Stack Learning:** Experimenting with Node.js and Express to learn how server-side computing connects with relational databases.
- **Automation Scripts:** Putting together basic Python scripts to handle repetitive file organization and daily administrative tasks.
- **Modern Web Standards:** Keeping up with accessible web design patterns and new layout approaches to make interfaces cleaner.
